ELECTRONIC PRODUCTS PERFORMANCE AND STOCK LEVEL OVERVIEW

...prepared by Shukura Adebayo Salawudeen

Understanding the dataset structure

DATA SUMMARY

Fields Analyzed:

- Product name
- Category
- Brand
- Price
- Stock level
- Availability

Objective & Questions:

- Evaluate Product Performance
- Identify high and low performing products
- Product availability & turnover
- Market Preference

PRODUCT PERFORMANCE

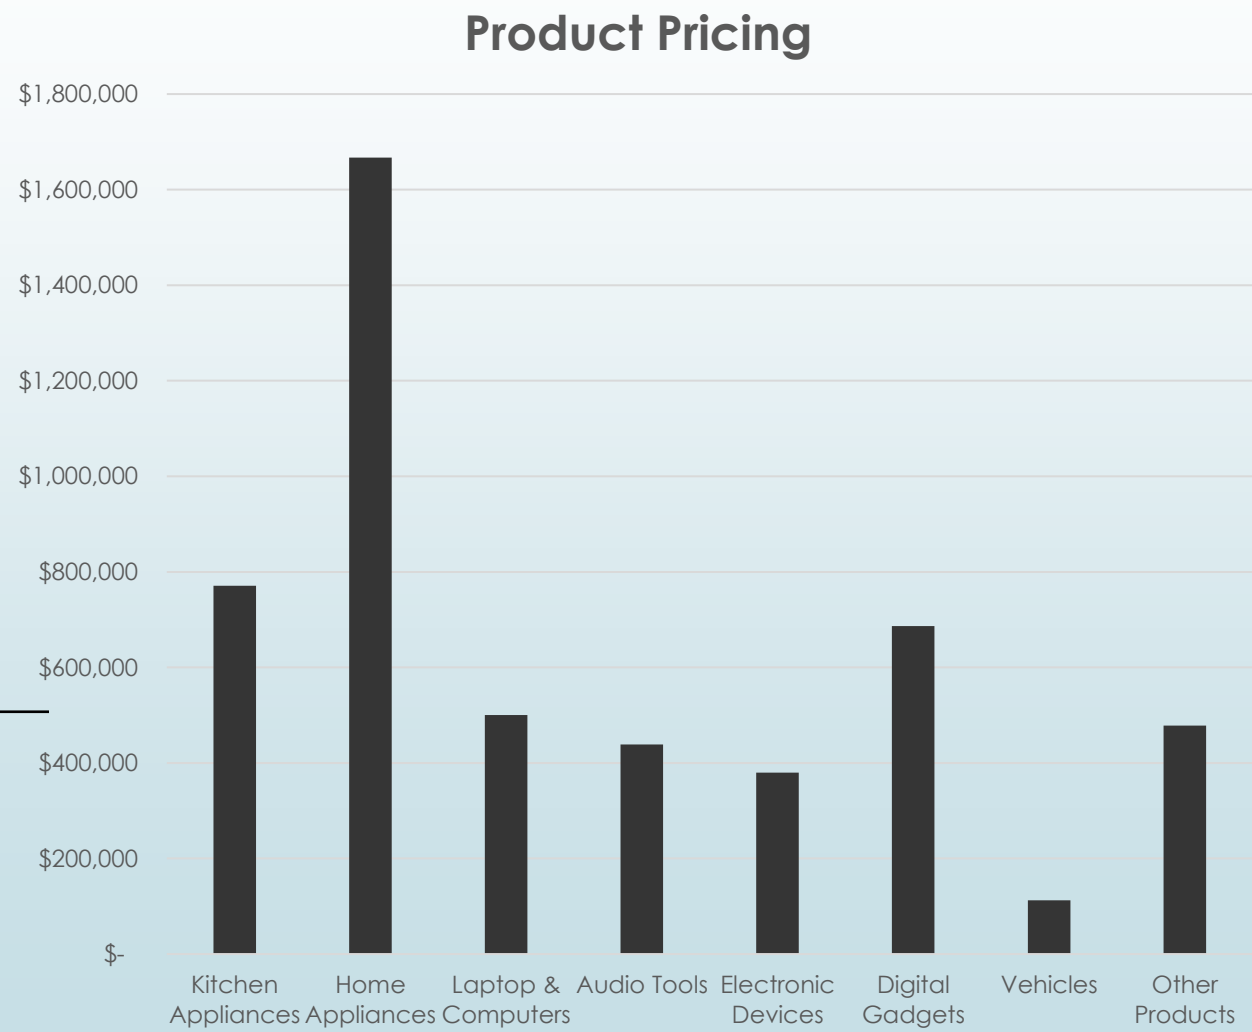

Key Insights:

- **High-dominating Products in pricing**

Product	Total Price
Fan	$ 22,686
Dock	$ 22,415
Freezer	$ 15,978

- **Low-Performing Items**

Product	Total Stock	Total Price
Smart Radio Pro Ultra X	675	$ 1
Pro Drone Vacuum Clean	485	$ 1
Portable Microphone Headphones	559	$ 1

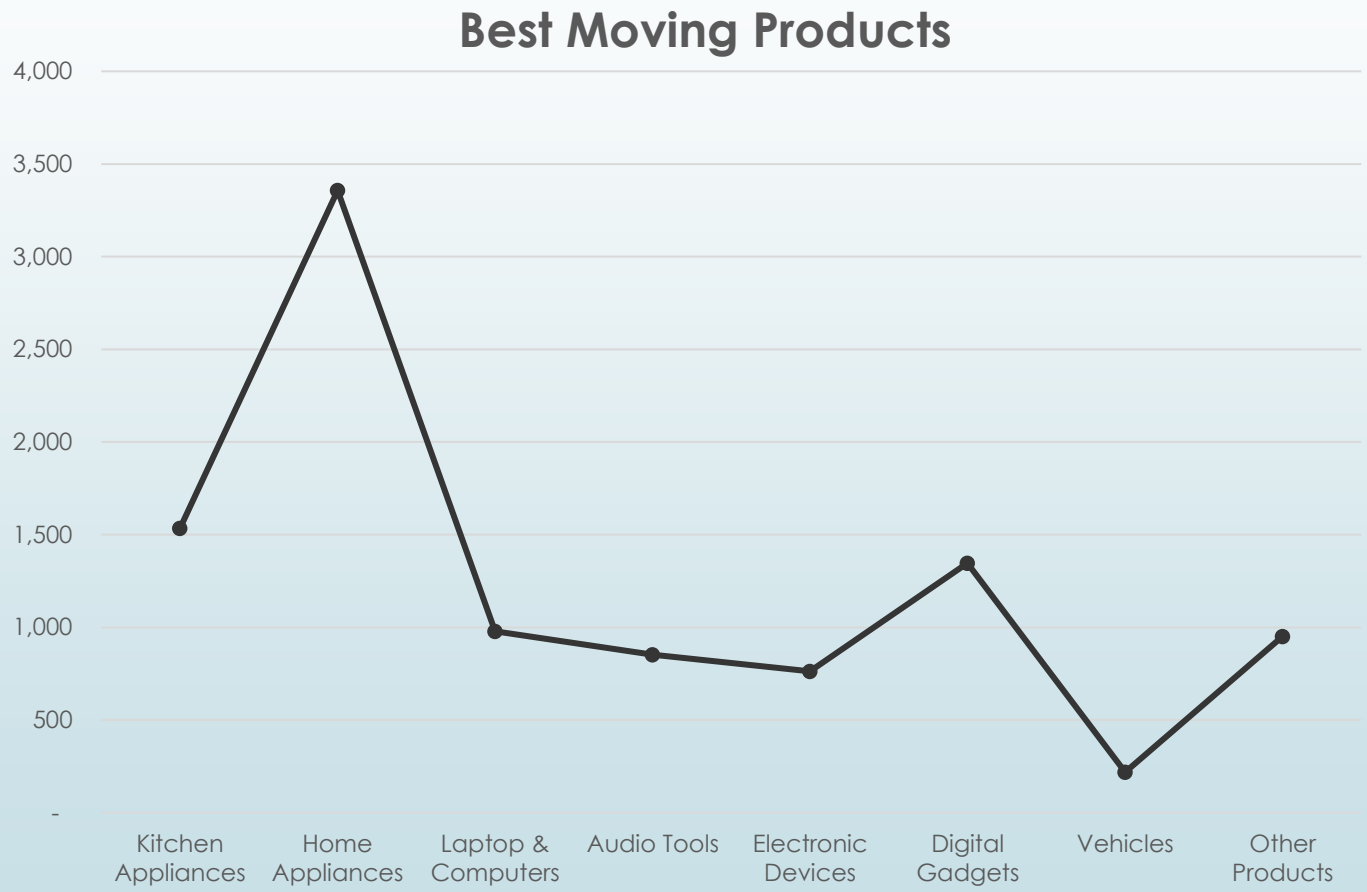

PRODUCT PERFORMANCE

Key Insights:

- Top 5 high-demand products
- Best Performing Category

Product	Quantity
Fan	23,302
Dock	20,982
Freezer	18,079
Lock	23,302
Brush	20,982

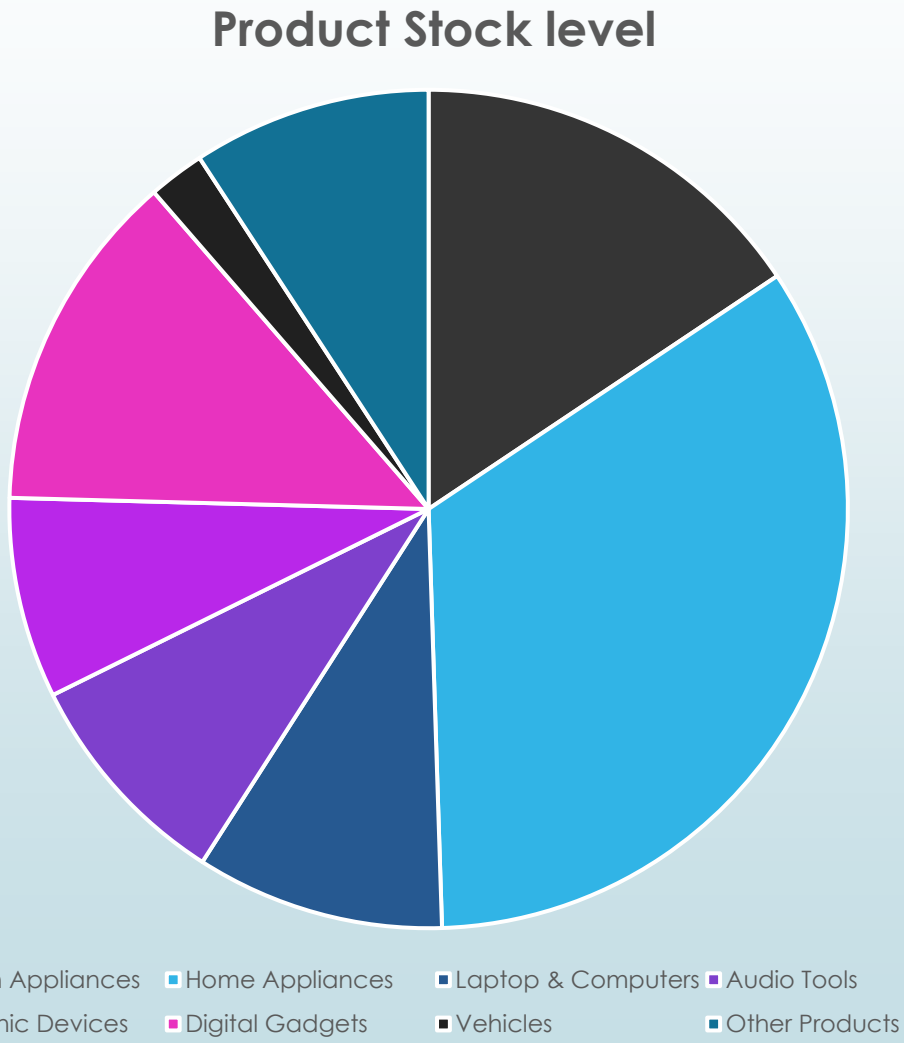

STOCK LEVEL ANALYSIS

Observation:

Categories and products that dominate in availability

Product	Availability Level
Fan	38
Dock	35
Freezer	30
Lock	27
Brush	25

ISSUES AND LIMITATIONS

Limitations:

- No date field for trend analysis
- No Location field listed
- No Sales Data Records
- Inconsistency in data structure

RECOMMENDATIONS

- Focus on high in-demand products
- Reduce Inventory for low-performing items
- Improve marketing for weak categories
- Monitor stock levels regularly using dashboards
- Include Sales Record for better insights
